Research Interests

My research focuses on **AI for Healthcare**, with a long-term vision of building trustworthy medical AI systems. I develop **medical LLMs and agents** for clinical decision support. My interests also extend to **trustworthy and explainable AI**, particularly improving the reliability, transparency, and verifiability of AI in healthcare. In parallel, I build **multimodal medical foundation models** and curate clinical datasets to learn unified representations across medical images, text, and other clinical data.

Education

The Chinese University of Hong Kong, Shenzhen — Shenzhen, China
Master of Philosophy in Computer Science — Sept. 2025 – Jun. 2027

- **Advisor:** *Prof. Juexiao Zhou*; **GPA: 3.6/4.0**

Hangzhou Dianzi University — Hangzhou, China
Bachelor of Engineering in Computer Science and Technology — Sept. 2021 – Jun. 2025

- **Advisors:** *Prof. Renshu Gu* and *Fangli Guan*; **GPA: 3.8/4.0**
